

# OMEGA-TRAFFIC™ A-19 Incandescent Double and Standard Life Traffic Signal Lamps

## LIFE

- 10,000 to 16,000 Hours
- At two-year rated life, OMEGA Double Life 16,000 hour lamps are the longest life traffic signal lamp on the market

## APPLICATIONS

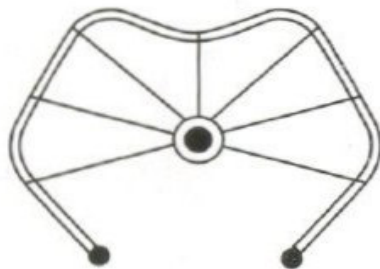

- Traffic signals

## WARRANTY

- 1-2 years

## Overcoming The Main Causes Of Lamp Failure

### Omega Traffic Mount (C-C11V7)

Uniform mount eliminates sharp bends in the filament to improve light in the focal point of the signal and dramatically increase lamp life

### Reason for Failure

### The "Omega" Answer

Vibration.....

Special vibration-resistant filament with to nine filament supports

Weak Filaments / Poor Design..

Proprietary, five-alloy, non-sag, high-grade tungsten filament in the unique Omega mount

Contamination of lamp..... through impurities such as oxygen, carbon and water

Unique multi-compound time-released gettering system that maintains the purity within the lamp

Heat.....

The aluminum reflector disc directs the heat forward to protect the socket from extreme heat

+ L.C.L. = Light Center Length

\*\* M.O.L. = Maximum Overall Length (in inches)
